PROFESSIONAL EXPERIENCE:

Business Analyst | Ascra Technologies LLP — Apr 2025 – Present

Projects: Rajmarg Pravesh Portal, NHAI DataLake 3.0

- Delivered business analysis and product ownership support for Digital India Corporation (MeitY) across MoRTH and NHAI digital transformation initiatives.
- Owned business analysis and product delivery across 10+ workflow modules, from requirement discovery and solution design to UAT, production release, and post-production support.
- Authored BRDs, FRDs, SRS, RTMs, user stories, acceptance criteria, functional specifications, and process workflows to translate business requirements into scalable digital solutions.
- Collaborated with MoRTH, NHAI, DIC, Engineering, QA, and UI/UX teams to prioritize product backlogs and deliver Agile releases, defining business requirements for GIS

workflows, BharatKosh payment integration, eSign, role-based access, APIs, workflow automation, and legacy data migration.
- Led UAT planning, defect triage, release validation, stakeholder sign-offs, and production readiness while creating wireframes, workflow diagrams, SOPs, user manuals, and release documentation using Figma and Microsoft Visio.

Business Analyst | Intechglobe Pvt. Ltd. Apr 2021 – Apr 2025

Projects: Healthcare Management System

- Delivered end-to-end business analysis for enterprise applications, from requirement elicitation and solution design to deployment and production support.
- Prepared BRDs, FRDs, SRS, RTMs, user stories, functional specifications, and workflow diagrams using Confluence and Microsoft Visio.
- Collaborated with business stakeholders, product teams, developers, and QA to prioritize requirements, manage sprint backlogs, and deliver Agile (Scrum) releases.
- Developed wireframes, dashboards, analytical reports, and process visualizations using Figma, Power BI, SQL, and Microsoft Excel, while supporting stakeholder workshops, product demonstrations, user training, and change management.

Business Analyst | Coditro LLP Feb 2020 – Mar 2021

Projects: ATS, VMS

- Gathered, analyzed, and documented business requirements through BRDs, FRDs, SRS, RTMs, process workflows, and functional specifications.
- Collaborated with business stakeholders and development teams to create user stories, acceptance criteria, and support Agile delivery.
- Participated in backlog refinement, sprint planning, GAP analysis, JAD sessions, and defect tracking to ensure accurate requirement implementation.
- Supported the implementation of ATS and VMS platforms through stakeholder coordination, wireframing (Figma), workflow design (Microsoft Visio), testing, and deployment support.

Business Development Analyst | RTL Technologies Mar 2019 – Feb 2020

- Analyzed client requirements, prepared business proposals, requirement documents, and project reports to support pre-sales and business development initiatives.
- Conducted market research, competitor analysis, stakeholder communication, and client presentations to identify business opportunities and support client acquisition.
